## STORED PRODUCTS PEST TREATMENT PREPARATION

Treatment Date: \_\_\_\_\_

A professional technician will enter your home to **inspect and treat for pests commonly found in stored food products**. Stored product pests included Indian Meal Moth, Larder Beetles, Grain Moths, Weevils, Sawtooth Grain Beetles, etc.

To ensure the treatment is effective, please follow all instructions carefully.

---

### IMPORTANT INFORMATION:

- **Do not use any pest control sprays or products** before or after this treatment. This may prevent the technician from treating your home.
- **You must leave the unit during treatment** and stay out for **at least 2 hours** after it is completed.
  - If you are **pregnant**, have **health issues**, or have children **under 2 years old**, you must stay out for **at least 4 hours**.
- When you return, **open a window for 15 minutes**, if possible, to air out your home.
- **You must be fully prepared before the technician arrives**. The technician will not wait for you to finish preparing.

---

### Preparation Checklist:

1. **Empty all kitchen cabinets, drawers, and the area under the kitchen sink.**
2. **Do NOT place items** on kitchen counters, stove, floor, or in the sink.
  - Instead, stack them neatly in the **living room or dining room**.
3. **Throw away any open packages** of grains, flour, sugar, or similar products.
4. **Clean shelves, drawers, and countertops** before the technician arrives.
  - After treatment, let sprayed areas **dry for 2 hours** before returning items.
  - **Do not re-clean** shelves after treatment.
5. **Cover fish tanks and turn off filters.**
  - All other pets must be **removed for 2 hours** or placed in a **closed back bedroom** with the door shut.

---

Important Notice from Management:

If your home is not fully prepared, you will be charged a \$\_\_\_\_\_ fee.

Thanks for your cooperation!
